

Elevation of the base of the Wausau aquifer, Marathon County, Wisconsin

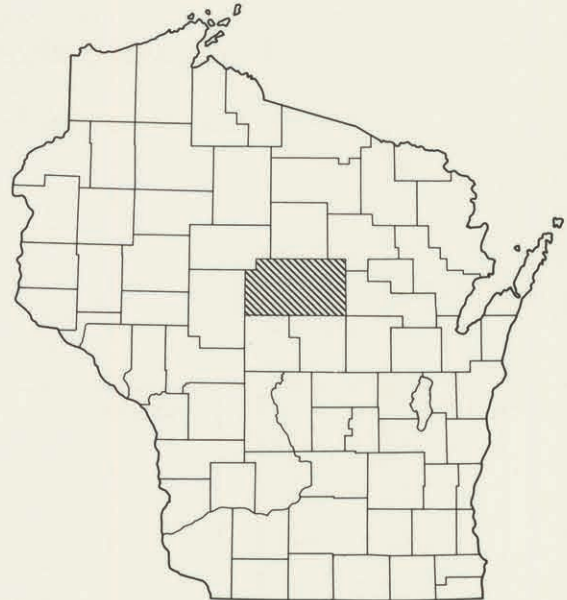

Eloise Kendy and
Kenneth R. Bradbury

1988

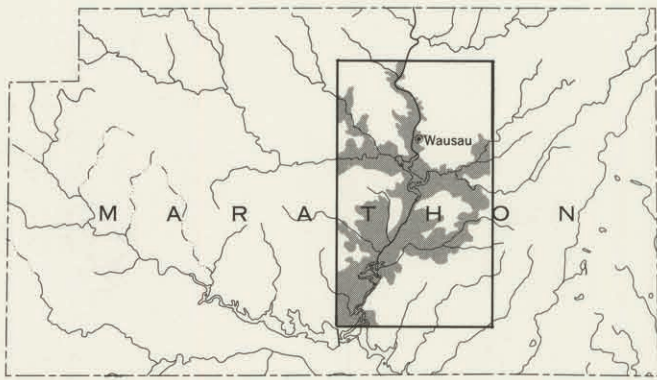

EXPLANATION

- Boundary of the Wausau aquifer
- Contour interval is 20 feet.
- Solid contours are accurate within 30 ft; dashed contours are approximate.
- Datum is mean sea level.

The base of the Wausau aquifer corresponds to the bottom of the sand and gravel. In some places the sand and gravel rests on bedrock; in others, on clay.
