

Attenuation potential of soils overlying parts of the Wisconsin River valley, Marathon County, Wisconsin

Eloise Kendy and
Kenneth R. Bradbury

1988

EXPLANATION

- Boundary of the Wausau aquifer
- Attenuation potential
 - Good
 - Marginal
 - Least
- Bedrock within 5 feet of surface.

Based on data available from U.S. Conservation Service, Soil Survey of Marathon County, Wisconsin (in press). Data for the entire county were not available at the time of this study.

Note: No soils in this area of Marathon County fall into the category "best" attenuation potential.
