

GROUNDWATER QUALITY INVESTIGATION OF DUNN COUNTY, WISCONSIN

Nitrate-Nitrogen
 in mg/L (NO₃-N)

Explanation

- 15 location and value of well sampled in 1986
- 4 location and value of well sampled in 1987, plotted to nearest quarter section
- 20 location and value of well sampled in 1987, plotted to nearest quarter, quarter section
- 11 location and value of well sampled in 1987, plotted to nearest quarter, quarter, quarter section
- △ above detection limit, but below 1
- below detection limit

Chemical analyses by K.L. Lund, 1986-87.
 Analytical method used: cadmium reduction.
 Reproducibility: ± 1 mg/L at 0-10 mg/L.

Compiled by I.D. Lippelt, 1987

Compilation assistance and drafting by
 E.C. Lawson, 1987

Samples collected February 6, 1986 through
 June 26, 1986, by J.S. Wallin

Additional samples collected and submitted by
 homeowners in March 1987; these sample
 locations have not been field checked.

A part of the Dunn County Groundwater Resource Investigation, a
 joint project of the Wisconsin Geological and Natural History
 Survey and the Dunn County Board.
