

Ferrous Iron in mg/L (Fe)

Compiled by I.D. Lippelt, 1986

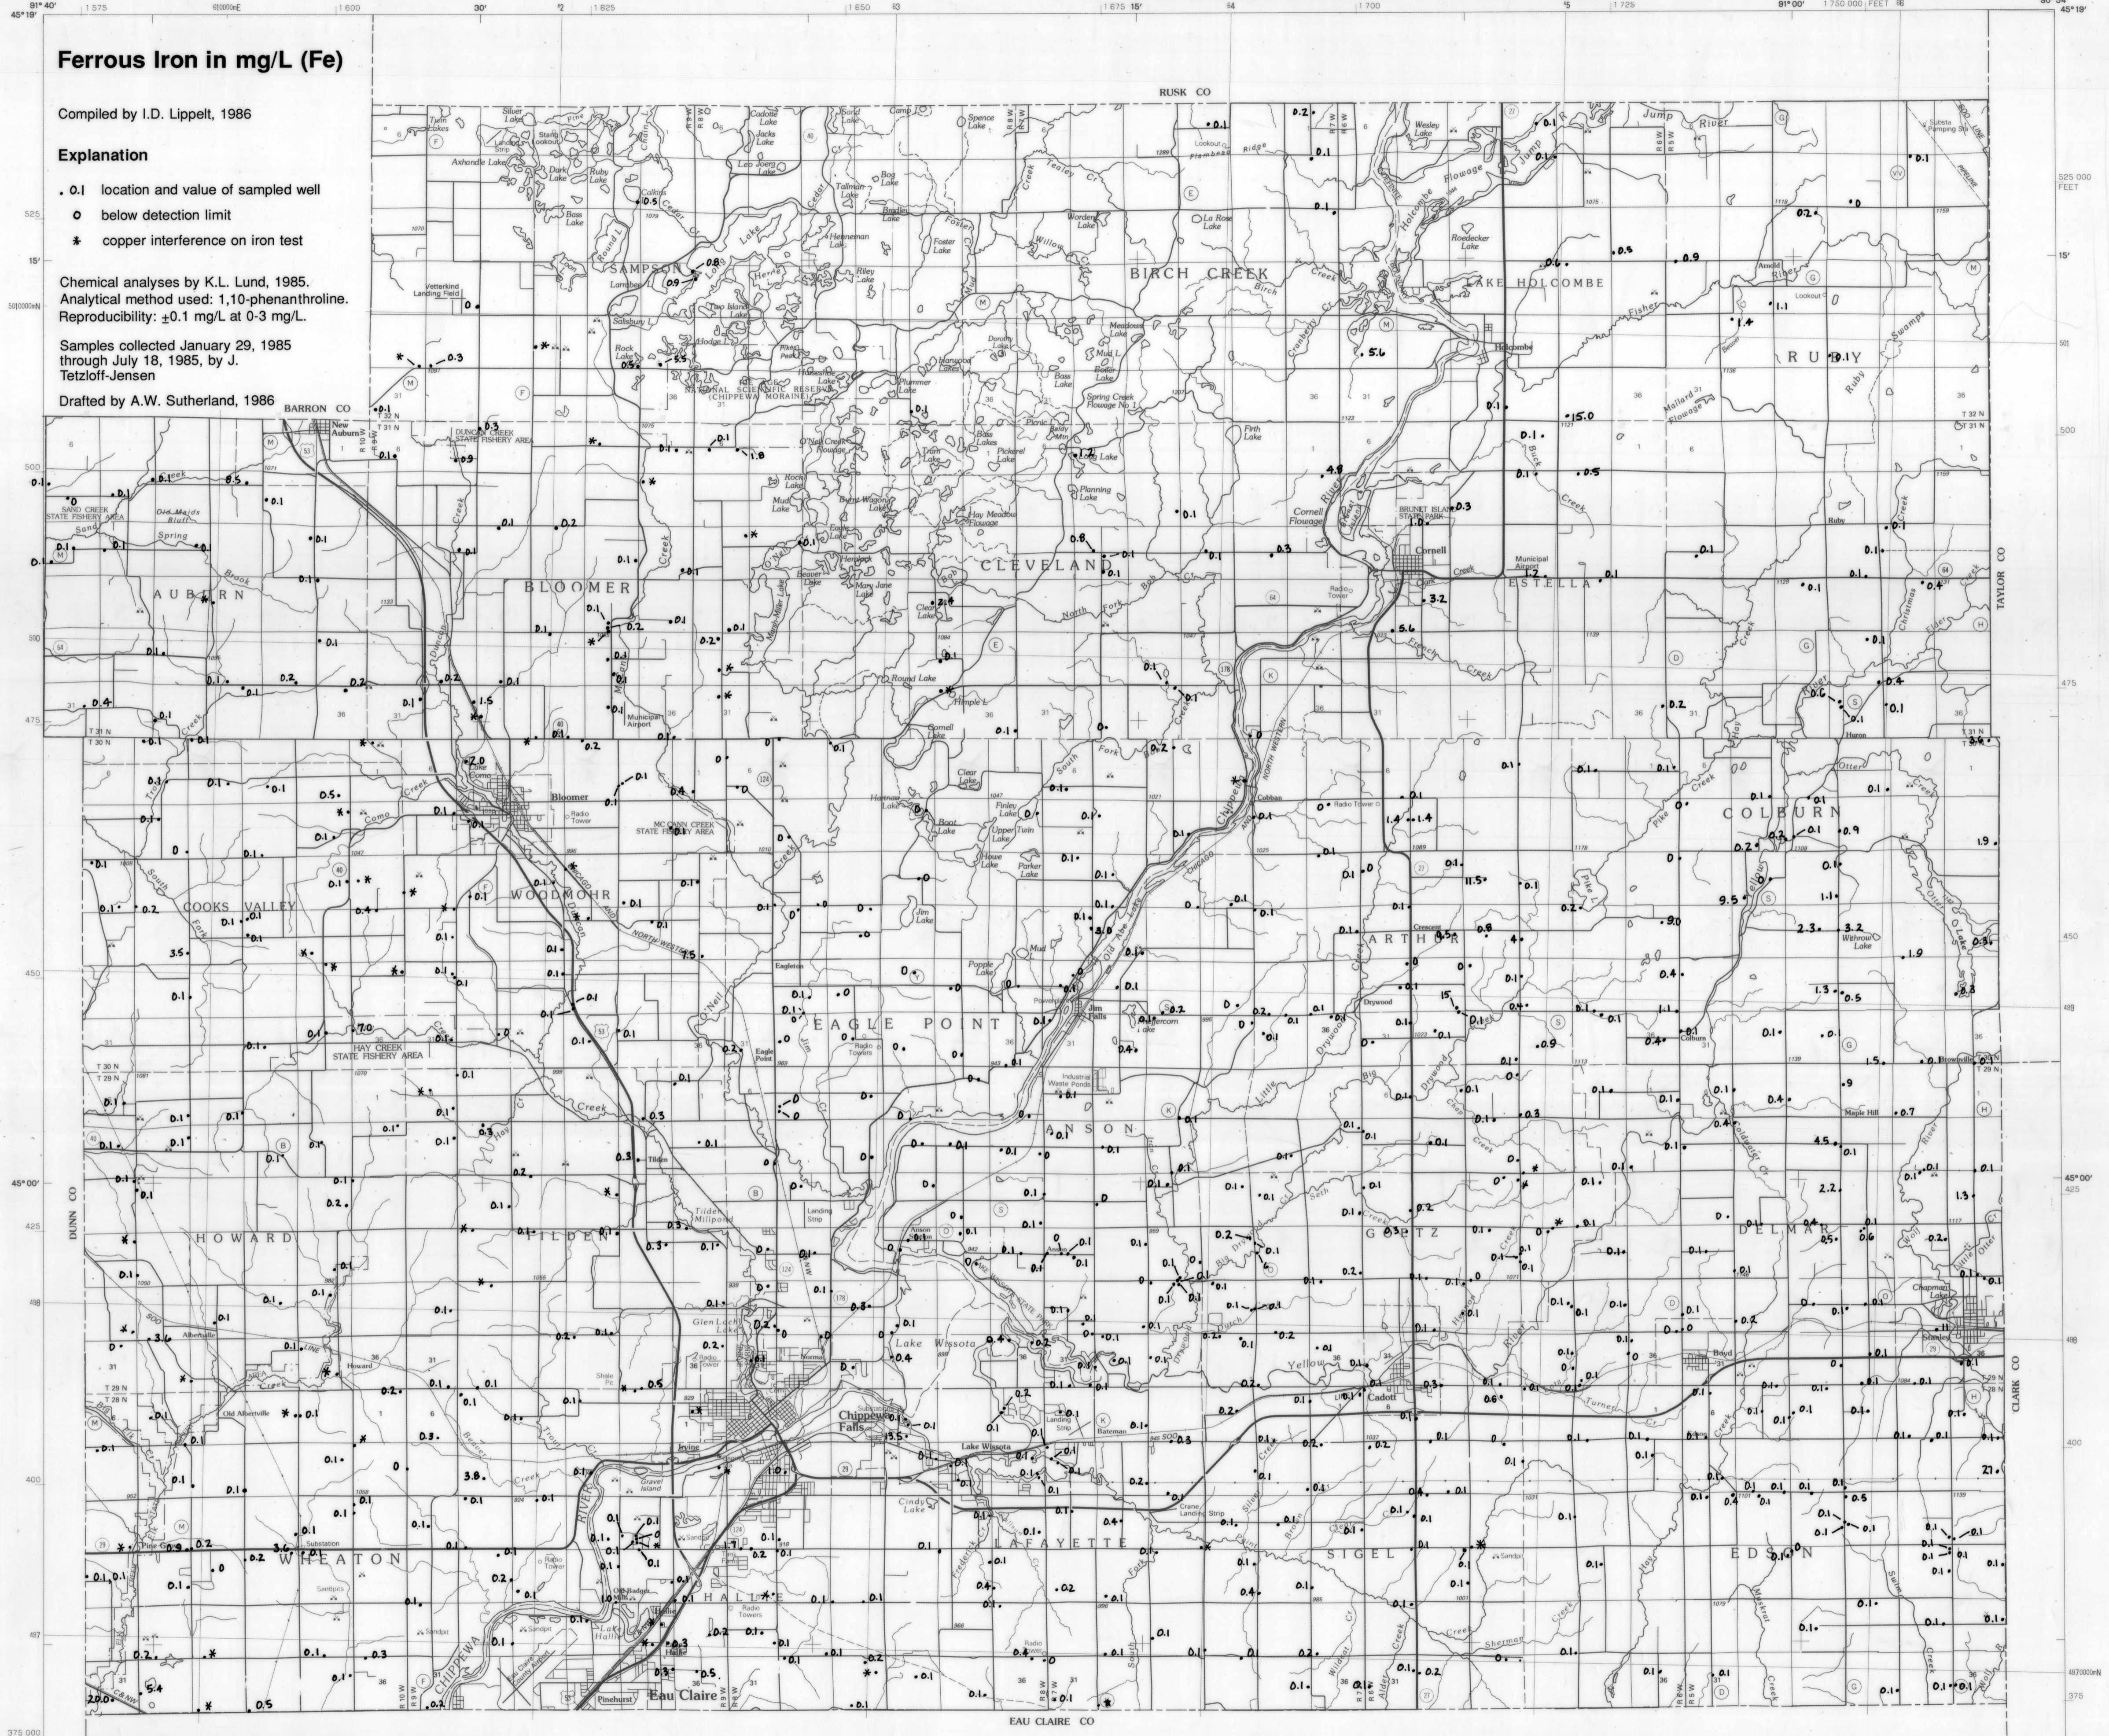

Explanation

- 0.1 location and value of sampled well
- below detection limit
- * copper interference on iron test

Chemical analyses by K.L. Lund, 1985. Analytical method used: 1,10-phenanthroline. Reproducibility: ±0.1 mg/L at 0-3 mg/L.

Samples collected January 29, 1985 through July 18, 1985, by J. Tetzloff-Jensen

Drafted by A.W. Sutherland, 1986

A part of the Chippewa County Groundwater Resource Investigation, a joint project of the Wisconsin Geological and Natural History Survey and the Chippewa County Board of Supervisors.
