65	2-18		28N	14W	4	NE		silt sand		25 GPM						trees	cultivated			x		x	

No.	Type Access	Ownership	Poss. of Devel.	Remarks
104			poor	in run-off area
50			none	frozen
51			none	no definite spring head----frozen
52			none	no definite spring-head-----frozen
53			poor	low volume of flow----in run-off area
54			none	frozen
55			good	80 ft. of channel out of flood plain--- $\frac{1}{2}$ mile from farm--- $\frac{1}{2}$ mile from highway
56			none	in swamp area
57		Dunn County	poor	poor gradient---flow made up of several small springs
58		Hughes	fair	construction of dike could protect a small pond from run-off
59			none	dry
60			none	low volume of flow
61			none	dry
62		Spring Valley Lumber Co.	good	good road--good flow---poor gradient
63			none	low volume of flow---in run-off area
64			fair	spring head protected from run-off however channel is in run-off area
65			poor	poor gradient
