

Preliminary Quaternary Geology of Fond du Lac County, Wisconsin: Digital Information

William N. Mode and Thomas S. Hooyer

Open-File Report 2014-01-DI • 2014

Description

These files represent the digital information derived from Wisconsin Geological and Natural History Survey Open-File Report 2014-01, titled *Preliminary Quaternary Geology of Fond du Lac County, Wisconsin*, by William N. Mode and Thomas S. Hooyer. The information includes the map as a PDF file and as GIS data with metadata. The GIS data are provided in Esri shapefile format with metadata and layer (.lyr) files. Please see the metadata for information on how the GIS data have been captured and attributed.

To obtain a printed copy of the map and report, please contact WGNHS Map Sales (608.263.7389) and request *Preliminary Quaternary Geology of Fond du Lac County, Wisconsin* (WOFR2014-01).

System requirements

Software for viewing GIS data

- desktop GIS software capable of reading shapefile format (such as ArcGIS), or
- Esri ArcGIS Explorer, available free from www.esri.com
- an open source GIS application such as Quantum GIS (qgis.org) or uDig (udig.refractory.net)

Software for viewing PDF files

- Adobe Acrobat Reader (7.x or higher), available free from www.adobe.com, or
- Adobe Acrobat (7.x or higher), or
- GSView, available free from www.cs.wisc.edu/~ghost/

About shapefiles

Please note that a single shapefile consists of multiple files that share the same name, but have different file extensions (for example, shp, shx, dbf, prj). Editing or moving any of these files independently of the others could corrupt the data.
